SKILLS

HTML , CSS , JavaScript ,React , Bootstrap , Git , GitHub

Experience

Frozen – Ecommerce App React

Design And Development.

🔗 [Frozen](#)

Challenges

- Organizing state management logic using use context and create-context for products cart and checkout.

- Implementing dynamic filtering and sorting method efficiently.

- Using npm packages for notification, loading & Icons.

- Setting up local state for handling app navigation.

Approach & Solution

The app is structured using React + using local state to handle app navigation, useContext for state management, and async promise method for external API communication. react spinners for loading pages to improve performance. Product data, including categories and details and rating are dynamically fetched from fakestore API.

Tech Stack

- React.js
- CSS3
- React Toastify
- React Spinners
- React Icons

- -

Beans – Ecommerce App JS

Design And Development.

🔗 [Bean](#)

Approach & Solution

The app is structured using JavaScript. Using local storage for storing products data so even on load product selected in cart don't go away and setting up cart functionality and notification functionality.

STRENGTH

- ● **Problem Solving – Logical Thinking.**
